PROFIL

Digital Business & Data Analytics student with a business background and a strong interest in data analytics, finance, and AI/ML. Practical experience in SQL, Python, Power BI, and data modeling, as well as building my own analytics projects. I combine an analytical and strategic mindset with a strong understanding of business processes and the motivation to quickly learn new technologies and topics.

PROJECT EXPERIENCE

NordHome Retail Analytics | Data Analytics & Business Intelligence

- NordHome Retail Analytics | Data Analytics & Business Intelligence
- Analyzed sales, customer, and marketing data using SQL and Power BI, focusing on revenue drivers, customer retention, and marketing performance.
- Developed interactive Power BI analyses to investigate revenue, average order value, customer behavior, and marketing ROI.
- Identified that lower average order values were a key driver of the 1.7% year-over-year revenue decline and developed recommendations to increase basket size through bundling and upselling.
- Compared the performance of different marketing channels based on CPA and ROI, identified significant efficiency differences, and developed a recommendation for reallocating the marketing budget

PROFESSIONAL EXPERIENCE

Co-Founder | E-Commerce & Digital Business

11/2025 – 09/2026

- Built and developed my own e-commerce business.
- Responsible for e-commerce strategy, digital platform, and brand development.
- Implemented SEO, digital marketing, and analytics initiatives.
- Analyzed e-commerce and customer KPIs.
